How does the air fryer work?

The **air fryer cooks thanks to the high temperature air**, adjustable from **35°C up to 200°C**, which circulates at maximum speed and 360° inside the cooking chamber and guarantees uniform distribution of heat inside. It is precisely the hot air that allows for homogeneous cooking of the dishes and the formation of a crunchy crust on the outside, which has nothing to envy to traditional frying. **Thanks to the hot air,** there will be no need to add a lot of oil to obtain tasty fried food, because a simple spoonful will suffice, in this way you will bring **lighter but tasty food to the table for the whole family.**

From the large digital touch screen panel you can adjust cooking times, programs, temperatures and timers. Inside there is a tray for crunchier and tastier recipes. Airy Fryer 6L has a transparent basket to check cooking like a real oven: f**rying is right in your hands!**

The Airy Fryer 6L air fryer is easy to clean thanks to the non-stick basket with grill.
