

## BREAKFAST STATION

**Model:** 1344/00

**Code:** 00M134400AR0

**EAN:** 8003705114838

If you purchase your Breakfast Station now, you will have no further need to buy any other breakfast appliance, because the Ariete Breakfast Station is the 3 in 1 product that combines an electric Moka pot and a milk frother, which can also be operated simultaneously, with an electric kettle. So every morning you can let your imagination run wild and try new kinds of family breakfast, to suit everyone's tastes.

If for you the perfect breakfast is at home surrounded by adults and children, you will no longer be able to do without the Breakfast Station and its 5 functions that mean everyone can be in agreement:

**Electric coffee-maker:** the Moka pot is the coffee machine that gives you excellence. The electric Moka pot, with a 2/4 cup capacity, enables you to prepare your breakfast coffee quickly and conveniently, without sacrificing the aroma and body of espresso coffee. The electric Moka pot will turn itself off automatically once the coffee is ready, keeping it at the right temperature and without leaving coffee stains on the hob.

**Electric tea maker:** if you want to enjoy a hot cup of tea in the morning, perhaps with a drop of milk, the Breakfast Station's kettle will allow you to rapidly heat the water for tea, herbal tea or any other infusion, either to 80° or to 100°. In fact, the cappuccino maker turns into an electric kettle and in less than 2 minutes you will have water at 100° ready for infusing. The kettle function can be activated simply by pressing the right button and the Breakfast Station will turn itself off as soon as the water has boiled.

**Electric milk boiler and cappuccino maker:** how do you make latte macchiato at home? Frothing milk has never been so easy. While the Breakfast Station's electric Moka pot prepares the coffee, the electric milk boiler heats the milk and froths it, creating a mouth-watering soft creamy foam. If you cannot do without cappuccino, mochaccino, latte macchiato or frothy milk at breakfast, you simply have to have the cappuccino maker in your kitchen. The non-stick walls of the milk boiler make it easy to clean after use.

**Product specifications**
